

Mr. Brent Hale, VP Unconventional Resources with William M. Cobb & Associates Inc., will be speaking on "Survey of Parameters Used in Property Evaluation"

When: Thursday, January 21, 2016.

Where: Brookhaven College Geotechnology Institute

3939 Valley View Lane, Bldg H
Farmers Branch, TX 75244

Luncheon starts: 11:30am.

Presentation begins: 12:00pm

Cost: \$25 per person. Members and Guests are cordially invited to attend.

Please RSVP by Noon Wednesday, January 20, 2016

Abstract: This Survey is conducted annually by the Society of Petroleum Evaluation Engineers (SPEE) to obtain opinions from the evaluation community regarding a number of economic parameters used primarily in the United States and Canada to evaluate oil and gas properties. The purpose of this survey is to capture and analyze (1) opinions regarding a set of volatile economic parameters including projections of future oil and gas properties, and (2) opinions on the factors and methods used in valuing oil and gas properties. The survey also aggregates opinions regarding other topics of relevance to reserve/resource reporting which vary from year to year.

Abstract: Brent W. Hale is a vice-president, unconventional resources, at William M. Cobb & Associates, Inc. He has prior experience with the Williams Companies (1976 to 2007). His experience includes reservoir engineering where he has specialized in vertically fractured gas well analysis, horizontal well analysis and coal bed methane well analysis; including coal bed methane reserves in Colorado, New Mexico, Wyoming, Oklahoma, Pennsylvania, and Kansas. He has studied low permeability and shale gas reservoirs in Colorado, Kansas, Louisiana, New Mexico, North Dakota, Michigan, Oklahoma, Pennsylvania, Texas, and Wyoming. He has had responsibilities including production operations, environmental health and safety operations, reservoir engineering, and geological services. Brent is a registered professional engineer in the states of Texas and Utah. His activities at Cobb and Associates include reservoir studies, oil and gas reservoir evaluations and audits, environmental sound mitigation studies, and litigation support including witness services. He received both a bachelors and masters degree in Petroleum Engineering at the University of Wyoming.
