**Abstract:**

*SEC Comments Summary 2013*

Steve Gardner with Ryder Scott will present its recent review of SEC comments from this past year. The SEC's scrutiny is increasing as comment letters soared from 77 to 211 from the previous year.

The SEC regulators focused on several areas:

- questioning what portion of soon-to-be expiring undeveloped acreage was filed as proved undeveloped reserves;
- renewing emphasis on proper use of volume definitions;
- citing companies on the issue of reconciliation of material changes to PUDs.

The presentation also addresses the modernized rules that allow companies to use "reliable" technology in establishing reserve classifications.

**Speaker Bio:** Steve is currently a Senior Vice President at Ryder Scott Company and has over ten years of experience in reserve estimation. Before joining Ryder Scott in 2006, he served in a number of engineering positions with ExxonMobil Corporation. Steve earned a Bachelor of Science degree in Mechanical Engineering from Brigham Young University in 2001 (summa cum laude). He is a licensed Professional Engineer in the States of Colorado and Texas. He is also a member of the Society of Petroleum Engineers and the Society of Petroleum Evaluation Engineers.

**About SPEE:** <http://www.spee.org> SPEE was formed in 1962 as a professional, non-profit educational organization bringing together specialists in the evaluation of petroleum and natural gas properties. SPEE continues today to be strongly committed to providing educational and other services to its members and to the oil and gas industry, and to promoting the profession of petroleum evaluation engineering.
